Innovative Approaches and Solutions

Chris Collins

UNAIDS

Ambitious, but achievable, new target

on treatment

virally suppressed

Access to ART among key populations

Sources:

World Bank literature review and estimates, based on Mathers BM, et al., 2010. Makofane, K. et al., 2014 Hladik, W. et al., 2014. Cowan, F., 2014.

% of 58 HIV focal countries with reference to specific key populations in national HIV plan

Some ideas from the meeting

- Its not simple
 - social and legal impediments; no one size fits all
- Invest in communities
 - As providers and advocates: for services and rights
 - Capacity development: data and legal literacy, M&E, demand creation
- Sensitize health care workers
- Develop technology
 - To track service access & quality; discrimination
- Support for ambitious scale up (and some concerns)
- Better data and make it public
- No tokenistic engagement

Country transitions and the policy context

- Transitioning (before we figured it out)
- Middle income country challenges
- Community sector (acknowledged/underfinanced)
- Major donor successes and challenges
 - Global Fund concept notes
 - PEPFAR geo and population focus
 - Dedicated programs vs. core funding
- The era of "epidemiological control"

Fast Track and global AIDS targets
Use to drive: ambition, equity, quality
....when some see scarcity & pull back

Solutions & Innovations

- 1. Programming and policies
- 2. Access to prevention, diagnostics, treatment and care
- 3. Stigma and discrimination
- 4. Financing and accountability
- 5. Technology
