

International AIDS Society (IAS)

Founded in 1988, the IAS is the world's leading independent association of HIV professionals, with some 16,000 members from 180 countries working at all levels of the global response to HIV and AIDS.

IAS Priorities

IAS-Industry Liaison Forum (IAS-ILF)

The IAS-ILF is a mechanism to inform and support collaboration and partnership between industry and the IAS. Guided by a strong, multi-stakeholder advisory group, it performs this broad task by regularly providing opportunities for industry to understand the IAS's interests, and vice versa, seeking common ground to enhance the impact of our response to HIV and related co-morbidities.
