## PADO/IATT UPDATE FOR ARV MANUFACTURERS

Organized by the International AIDS Society's (IAS's) Industry Liaison Forum (ILF) and the Collaborative Initiative for Paediatric HIV Education and Research (CIPHER)

Monday, 19 October 2015 — 10:00-11:00 EST / 16:00-17:00 CET / 19:30-20:30 IST

Call through WebEx (please register [here](#))

As part of the thematic roundtable series on paediatric ARVs, the ILF and CIPHER are delighted to invite both generic and originator ARV manufacturers for a call focusing on some of the recent progress in the paediatric ARV space. The Paediatric ARV Drug Optimization (PADO) working group and the Interagency Task Team on the Prevention and Treatment of HIV Infection in Pregnant Women, Mothers and Children (IATT) will take this opportunity to provide updates on the revision of the WHO 2013 Consolidated ARV Guidelines and the IATT Optimal List of Paediatric ARV Formulations. ARV manufacturers will be able to stay up-to-date with this moving field and ask questions to members of these two working groups.

For additional background information, please refer to the latest ILF/CIPHER Thematic Roundtable on Paediatric ARVs [meeting report](#).

### **Opening words**

*Sébastien Morin (IAS, Switzerland) – Research Officer, ILF*

### **Presentation I**

#### **PADO: Background and update**

*Martina Penazzato (WHO, Switzerland)*

### **Presentation II**

#### **IATT Optimal List of Paediatric ARV Formulations: Background and update**

*Nandita Sugandhi (CHAI, USA)*

### **Q&A**

*Moderated by Nandita Sugandhi (CHAI, USA)*

### **Closing**

*Sébastien Morin (IAS, Switzerland) – Research Officer, ILF*
