

Information Communications Technology (ICT) Intern

About the IAS:

Founded in 1988, the International AIDS Society (IAS) is the world's largest association of HIV professionals, with members from more than 180 countries. IAS members work on all fronts of the global response to AIDS, and include researchers, clinicians, policy and programme planners and public health and community practitioners on the frontlines of the epidemic.

The IAS organizes the world's two most prestigious HIV conferences, each convened biennially in alternating years. The International AIDS Conference is the largest conference on any global health or development issue, and provides a unique forum for the intersection of science and advocacy. The IAS Conference on HIV Science brings together a broad cross section of HIV professionals and features the latest HIV science, with a focus on implementation – moving scientific advances into practice.

In addition, the IAS programmes advocate for urgent action to reduce the global impact of HIV, including increased investment in HIV cure research; optimizing treatment and care for infants, children and adolescents with HIV in resource-limited settings; preventing and treating HIV-related co-infections; and expanding access to prevention, treatment and care for key populations at higher risk for HIV – such as men who have sex with men, people who inject drugs, sex workers and transgender individuals – including protecting their human rights by combatting punitive laws and discriminatory policies.

More information on IAS can be found at www.iasociety.org.

Details of Internship:

The intern will be based at the IAS Secretariat in Geneva, Switzerland and will report to the ICT Manager. The internship is full-time to start as soon as possible until 31 August 2018.
