

- Assisting industry in developing child-friendly formulations
- Recruiting children under 12 in clinical trials
- Informing industry on most appropriate:
 - Formulations
 - FDC ratios
 - Age bands
 - Weight bands
- Providing clinical data (e.g., PK) for generic production or formulations
- Providing accurate post-marketing surveillance data

Newborn prophylaxis and treatment

Next steps on harmonizing around age/weight bands

FDC ratios - how can we come up with rational ratios!

Post marketing surveillance and pharmacovigilance collaborations
